PROFILE

Full Stack developer with more than a year of experience participating in real projects in banking, energy and SaaS. I combine knowledge in Java/Spring Boot and Angular, with experience also in Node.js, React and MongoDB, which allows me to work in modern enterprise architectures as well as in independent projects.

Used to working with agile methodologies, collaborating with multidisciplinary teams and applying best practices in SPA development and API design. Committed to code quality, continuous improvement and with great interest in technological innovation environments.
